E-commerce has undeniably helps accelerating the opportunity of online shop business makers. Shoppers are drawn to the stores faster but how do products and services stand out in this fierce competitive environment?

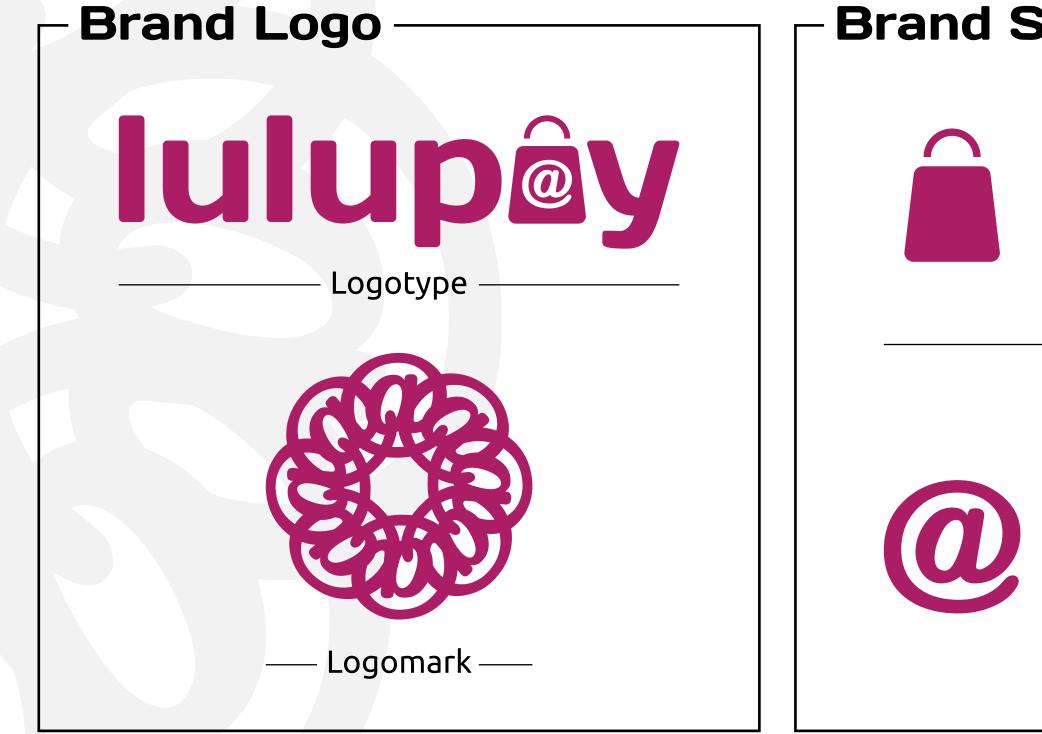

Will big companies with better financial capacity and capability wins everytime and all-the-time?

The answer to this is the ability of Online Stores to offer best virtual experience from the first time their website is visited until purchase is made and delivered. Turn prospects to clients with purposeful integrated systems from Lulupay.

Ultimately companies with the ability to get repetitive purchase and referral from existing customer win the market regardless the size!

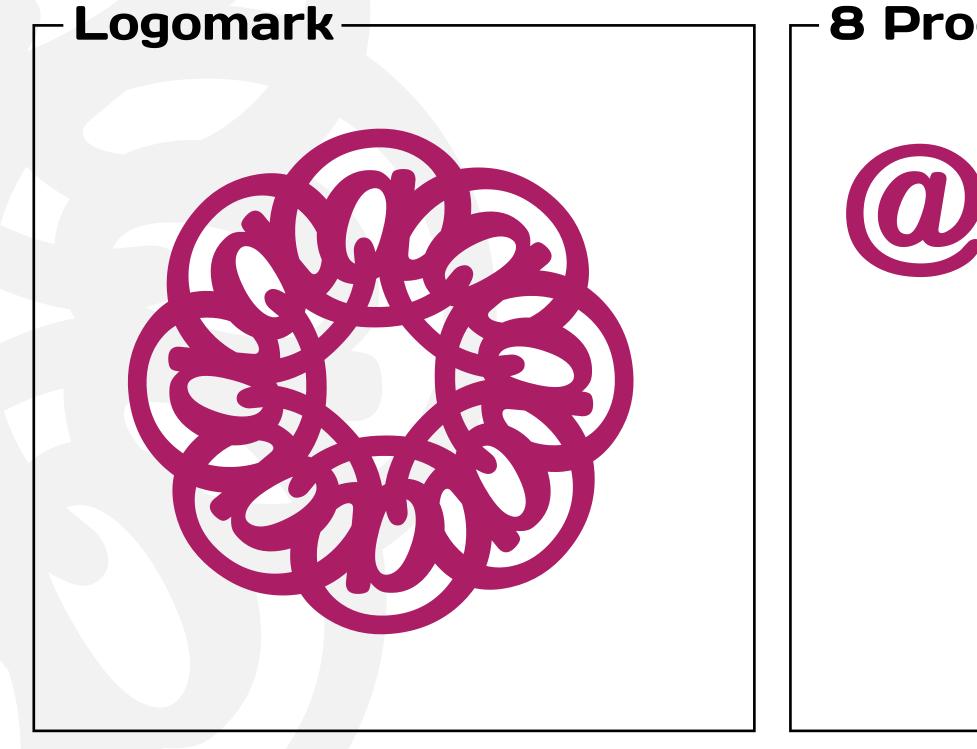

### **Brand Symbols**

Shopping bag represents a virtual shopping cart or basket. It is a common feature across many online shopping platforms, providing users with a familiar and intuitive way to manage their purchases.

In online and e-commerce contexts, the "@" symbol may be used in usernames or email addresses to identify and distinguish user accounts. It's often part of the login credentials required for accessing accounts and making purchases.

### 8 Product Components Pillar

The symbols @ combined brings two meanings:

The unity of all individual online shoppers at one market place with unique virtual shopping experience.

The 8 core components that become backbone to **lulupay.** 

These 8 components assist our clients to enhance the experience they want to manifest for their customers.

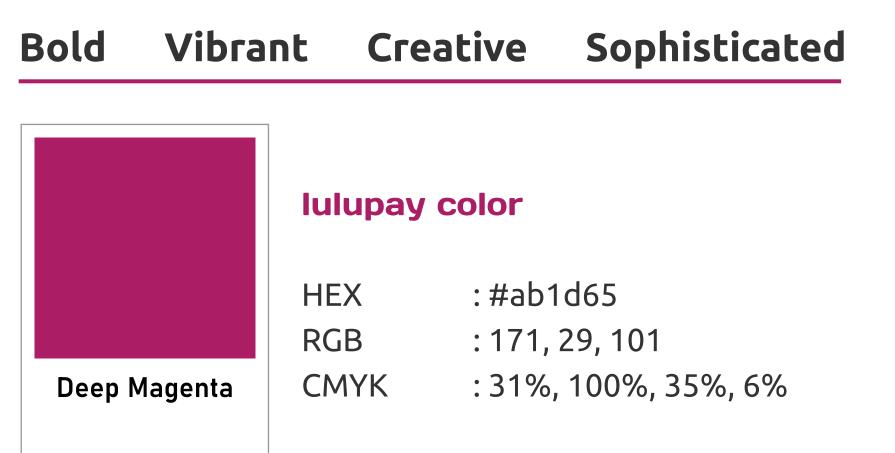

### **Brand Color**

Each individual clients of Lulupay will manifest the journey of online experience that they want their clients to experience differently.

In the process of transforming their business to digital, the essence of them as a brand will remain original and unique.

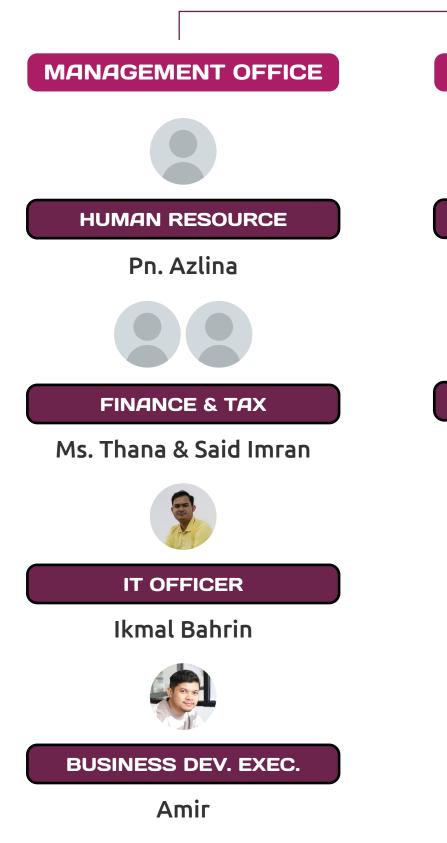

This helps the brand to stand out, recognized and remembered.
